TACTICAL TIPS & TRICKS

Positioning and Awareness

- **Stay Central**: Always try to maintain a central position relative to the ball and the goal. This minimizes the angles attackers have to shoot.
- **Off the Line**: Don't stay glued to your goal line. Step forward to cut down the angle and make yourself bigger in one-on-one situations.

Handling and Distribution

- **Catch or Deflect**: When catching isn't possible, ensure your deflections push the ball away from danger areas, preferably towards the sides rather than back into the center.
- **Quick Distribution**: After making a save, quickly assess your options for distribution. Look for opportunities to start a counter-attack by throwing or kicking the ball accurately to your teammates.

Communication and Leadership

- **Command the Area**: Be vocal. Communicate with your defenders to organize the backline and make sure everyone is aware of their roles, especially during set pieces.
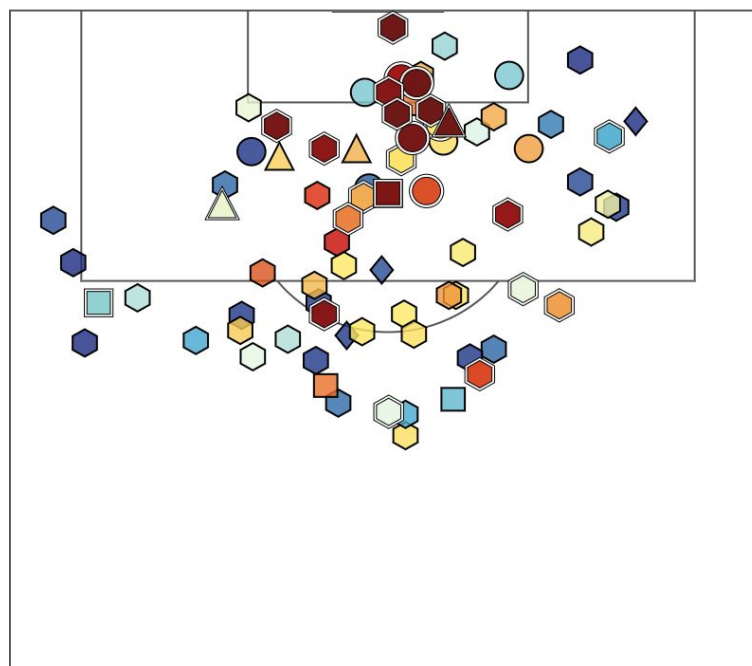

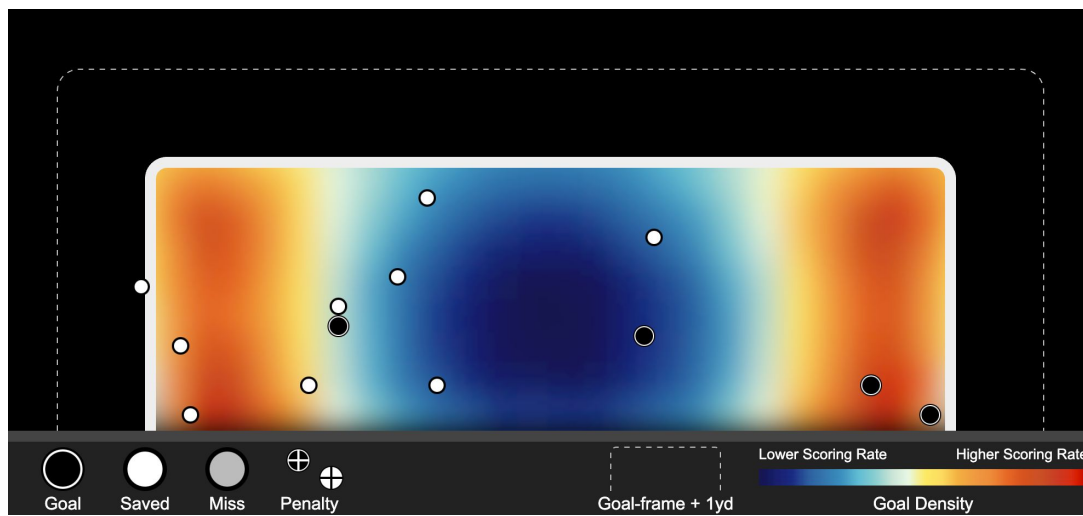

Handling Crosses and Aerial Balls

- **Judge Flight**: Practice judging the flight of crosses. Time your runs to intercept crosses confidently, and use both hands to catch the ball at the highest point.
- **Strong Fists**: If you can't catch the ball cleanly, make sure your punches are strong and directed away from danger areas.
